

# THE MSR LUG LOADER

VAB Solutions offers a unique MSR Grading system. *The MSR Lug Loader*  
This system offers dual functionality for planer mills:

- Board loading into the lugs
- Evaluate the MOE of the boards and classify them according to the MSR Grade

## **DISTINCTIVES ADVANTAGES OF THE MSR LUG LOADER**

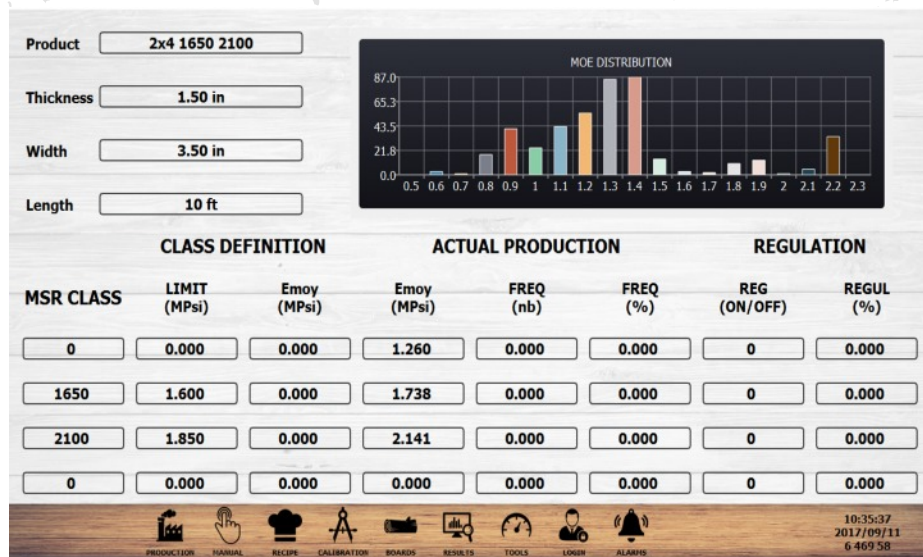

- Consistent performance regardless of the boards dimensions
- Proven technology
- Automatic calibration without operator intervention
- No Mechanical stress imposed on the boards
- Standardization of all components to facilitate the maintenance
- Easy system adjustment from the operator interface
- User-friendly interface and system

# MSR LUG LOADER

## TECHNICAL SPECIFICATIONS

- Board dimension that can be evaluate:  
2 x 3 to 2 x 6
- Boards length that can be evaluate:  
7 to 12 feet
- Heavy-duty mechanical design
- Operation speed : 200 boards / min
- Pneumatic pressure of the system is controlled electronically
- Software programmed on « Allen Bradley »
- Independant motorization of the chains and rotors

## USER-FRIENDLY TOUCH SCREEN INTERFACE

4695, rue de la Pascaline  
Lévis (Québec) Canada G6W 0L9

Bureau 866-834-0606  
Fax 418-834-0645
